Plot size -

Constructed area 72 m²

Terrace -

Further features include

Lift.

Excellent apartment just a stone's throw from the beach in Palmanova. The apartment is located on the 5th floor of a building built in 1982 and has 72 m2 of construction area. This is an excellent offer thanks to its incredible sea views and east orientation. Here the sun reigns throughout the day, both in winter and summer. To protect against excessive summer sun there are retractable awnings. There is space to install an air conditioning system. A personal parking space, a storage room and the price make this apartment attractive not only for personal use, but also for investment.
